

Designed for guitarists and singer-songwriters, Guitar Tracks Pro is the recording solution that takes your music from riff to hit easier than ever. With Guitar Tracks Pro you get much more than just recording software. You get an amazing virtual guitar amp for inspired, arena ready tones—without disturbing the neighbors. You also get an entire backing band of virtual instruments—always ready to accompany you. Plus: precise editing tools to comp the perfect solo or vocal track, a mixing Console, effects arsenal, even burn CDs and upload your music directly to the web—all for less than a few hours in the recording studio. Get it all in Guitar Tracks Pro.

Record all your guitar ideas quickly

Easy-to-use interface puts key features just a mouse click away, while precise editing tools help you tweak your tracks to perfection. You don't have to be a professional recording engineer to create your own high-quality tracks.

Native Instruments Guitar Rig 3 LE

Great tone, right inside your PC - just plug in your guitar and go. Access authentic sounds, from classic country to arena rock, and everything in between. Guitar Rig 3 LE has all your virtual amp needs covered.

Studio Instruments: Your backing band

No band? No problem. Cakewalk Studio Instruments boasts top-quality Bass, Drums, Electric Piano, and Strings - it's like having session players at your disposal 24/7.

Also available: *Guitar Tracks Pro USB* which includes *Guitar Tracks Pro 4* and the *Cakewalk UA-1G USB audio interface*
